ESSENTIAL MATHEMATICS 1

WEEK 1 NOTES AND EXERCISES

Why maths? What's the point?

The purpose of this course is hopefully to give you some background skills so you can go off into the world after college and succeed at something that you really want to do! (and we think some maths can really help you with that!)

PART 1

Watch this movie.. https://www.youtube.com/watch?v=VPCp5xsP-vk

What would **you** do if money were no object??

PART 2

For this video you are to come up with a question. A question that could be asked in a mathematics classroom. You do not need to solve the question.

http://www.youtube.com/watch?v=gDkd0Vaxf-c

PART 3

Find your own image from this website and create a question that is related to mathematics.

Print the picture and either paste it below or attach.

http://mathematicalimages.weebly.com/index.html

PART 4

Complete the quiz for this week on https://mathspace.co/, if you stuck on any question, you can either click on HINTS or ask your teacher for help.

You can join this class by visiting https://mathspace.co/join/ and using this code: **EKHD**

You can get your login and password from your teacher.
